Subject: Rockfall at Development Face

For your information

A rock fall occurred at a development face at Eloise Mine yesterday morning while persons were charging. An operator who was believed to be priming/charging lifters received lacerations including two to his head requiring stitches, a broken left collarbone and two broken ribs (at the back).

Eloise Mine was not on the list circulated previously as having any prior reported occurrence of such an event.

The incident is under investigation.

Please look at the effectiveness of your current controls in protecting persons carrying out these activities.

Regards,
Phil

Phillip Casey
