Dear Sir

I refer to your application for Authority to Prospect (ATP) Number 889.

After due consideration, it has been decided to grant ATP 889, pursuant to section 41(1)(a) of the *Petroleum and Gas (Production and Safety) Act 2004* (the P&G Act).

Please find enclosed the original instrument of authority endorsed accordingly.

Work program activities during the initial work program period for ATP 889 will be monitored on a yearly basis.

It is noted that the initial work program for ATP 889 requires over two hundred wells be drilled in the first four years of the authority. This work program was bid by Pure Energy Resources Pty Limited (Pure) in order to win a competitive tender process in large part awarded on the basis of exploration activities proposed to be carried out in the initial term of the authority. The work program activities bid by Pure have been accepted in good faith as the petroleum activities that will be completed by Pure during the initial work program period of the authority.

Such a large number of wells is recognised as being many times the number likely to be required to obtain the level of knowledge of reserves and resources of petroleum required for the grant of Petroleum Leases (PL) covering the entire authority to prospect.

Website [www.deedi.qld.gov.au](http://www.deedi.qld.gov.au)  
ABN 24 830 236 406

In order to ensure that work program activities tendered to win the call for tenders are completed, in considering proposed initial development plans for PLs applied for during the initial work program period of ATP 889 regard will be had to the nature and timing of any uncompleted initial work program activities for the respective area of ATP 889. A proposed initial development plan will be expected to propose activities equivalent in nature and timing to any work program activities uncompleted in the initial work program for ATP 889.

Pursuant to section 121(1)(c) of the P&G Act it is a requirement for grant of any ATP-related petroleum lease application that the conditions of the relevant authority have been substantially complied with. To avoid any misunderstanding I advise that work program obligations under the ATP continue whilst PL applications are being decided and that substantial compliance with the relevant authority will be assessed at the time of deciding such PL applications.

Should you have any further enquiries, please contact Mr Anthony Christensen, Manager, Petroleum, Gas and Geothermal Unit, Mining and Petroleum Operations of the Department of Natural Resources and Mines on telephone number (07) 3247 4540 or email [dmpetroleumtenures@deedi.qld.gov.au](mailto:dmpetroleumtenures@deedi.qld.gov.au).

Hi Vic

Please find attached a revised Draft instrument of Authority for the grant of ATP 889. We are seeking acceptance of the terms and conditions prior to recommending the application proceeds to grant.

The attached replaces a similar request posted to you recently which has not yet been responded to.

Vic. I am advised that the grant of this ATP is an urgent priority for QGC s.73  
s.73 For this reason, I have emailed this to you but would you also like the  
hardcopy posted?

We look forward to hearing as soon as so that we can get this one finalised.

Vic,

As a follow up to our meeting last week please find attached a revised draft instrument for ATP 889.

As outlined in our meeting last week, changes to the proposed instrument for ATP 889 made since the draft document provided to you for consultation by letter of 11 March 2011 are:

1. a condition reflecting the "future act" decision made by the National Native Title Tribunal; and
2. additional detail specifying the initial work program activities to more accurately reflect the work program tendered.

If you wish your application for ATP 889 to proceed, please provide written confirmation of your acceptance of the proposed instrument within 20 business days of the date of this correspondence.

Your response should be addressed to:
