RTI DL RELEASE - DNRM

GLENCORE

29 October 2014

Mr Luke Croton
Executive Director, Mineral and Coal Operations
Department of Natural Resources and Mines
PO Box 15216
City East Q 4002

Dear Mr Croton

Wandoan Coal Project – Mining Licence Applications

Thank you for your letter dated 17 October regarding Mining Lease Applications (*MLAs*) for the Wandoan Coal Project (the *Project*).

We note your comments regarding our proposed approach to development of the Project and can advise since our last letter to you dated 24 September 2014, work to revise the Co-Development Plan with QGC has progressed.

The revised Co-Development Plan will form the basis of a revised Project Initial Development Plan (*IDP*) that we intend submitting to you for consideration. We note your suggested timeframe for this to occur and will continue to keep you informed of progress in this regard.

Please also find attached signed special conditions for MLA 50229 and MLA 50230.

If you would like to discuss further, please contact Ms Helen D'Arcy sch4p4(6) Personal information
helen.darcy@glencore.com.au.

Yours sincerely

Glencore Coal Assets Australia Pty Limited ACN 163 821 298

Special Conditions – MLA 50230

We, the applicants for Mining Lease 50230, hereby consent that the mining lease shall be subject to the following special conditions:

SPECIAL CONDITIONS

1. The holder must ensure that no open-cut mining of any type shall occur during the life of this project at any point which is located within a “high management zone” with a radius of two thousand (2000) metres measured in a straight line in any direction from the point at which the centre-line of Moore Street in Wandoan intersects with the centre-line of Lawton Street in Wandoan. Mining activities other than open-cut coal extraction, including for example, roads, pipelines, powerlines, etc will not be excluded.
2. The holder must ensure that the areas of land occupied by the proposed Woleebee South Pit and the proposed Glen Haven Pit, as shown on the attached plan titled “Woleebee South and Glen Haven Pit Outlines” to these conditions, are used only for infrastructure purposes associated with mining activities on Mining Lease Numbers 50229, 50230 and 50231, unless otherwise authorised by the Minister.

END OF SPECIAL CONDITIONS

Special Conditions – MLA 50229

We, the applicants for Mining Lease 50229, hereby consent that the mining lease shall be subject to the following special conditions:

SPECIAL CONDITIONS

1. The holder must provide the owners of land described as Lot 34 on FT480, Lot 34 on FT490, Lot 35 on FT575 and Lot 35 on FT987, whilst each land parcel remains in the ownership of persons and entities other than the holder, with continuing access to the land via roads at the same standard of condition as was in existence on 27 March 2012. The holder may vary the location of the roads used for access to the described land from time to time, provided ongoing access at that same standard of condition by road to the described land is maintained.
2.
 - a. For the land described as Lot 34 on FT480, Lot 34 on FT490, Lot 35 on FT575, Lot 35 on FT987, Lot 36 on FT493 and Lot 37 on FT575, whilst each land parcel remains in the ownership of persons and entities other than the holder, and subject to paragraph b., the holder must not interfere with the water pipelines, as depicted on the survey plan numbered "Water Pipes", such that the pipelines would not be capable of being used by the owner of the land on which they are situated to supply water to any water storage feature that is connected to those water pipelines and is located within "restricted land" as depicted on that survey plan.
 - b. The holder may relocate the water pipelines depicted on the survey plan numbered "Water Pipes" from time to time to enable it to undertake its mining activities, provided that:
 - i. The holder shall meet the costs of the pipeline relocation; and
 - ii. The relocation must be done in such a manner as to cause no disruption to the land owner's ability to supply water to any water storage feature that is connected to those water pipelines and is located within "restricted land" as depicted on that survey plan.

Hi Peter

There's two things left now:

1. Ministerial approval for the coordination arrangement (CAR); and
2. IDP Approval (after CAR approval).

The CAR & the IDP should reflect the same information in terms of when operations are proposed to commence, and an amended IDP is to be lodged by Glencore to reflect that. We understand that the Minister won't approve the CAR until this amendment to the IDP (commencement of operations) shows consistency in that regard.

I had draft grant briefs prepared back in July this year. They just need to be put in the newer grant brief format (which isn't very different from the older one).

Sketch Plan to be provided.

RTI DL RELEASE - DNRM

Special Conditions – MLA 50229

We, the applicants for Mining Lease 50229, hereby consent that the mining lease shall be subject to the following special conditions:

SPECIAL CONDITIONS

1. The holder must provide the owners of land described as Lot 34 on FT480, Lot 34 on FT490, Lot 35 on FT575 and Lot 35 on FT987, whilst each land parcel remains in the ownership of persons and entities other than the holder, with continuing access to the land via roads at the same standard of condition as was in existence on 27 March 2012. The holder may vary the location of the roads used for access to the described land from time to time, provided ongoing access at that same standard of condition by road to the described land is maintained.
2.
 - a. For the land described as Lot 34 on FT480, Lot 34 on FT490, Lot 35 on FT575, Lot 35 on FT987, Lot 36 on FT493 and Lot 37 on FT575, whilst each land parcel remains in the ownership of persons and entities other than the holder, and subject to paragraph b., the holder must not interfere with the water pipelines, as depicted on the survey plan numbered "Water Pipes", such that the pipelines would not be capable of being used by the owner of the land on which they are situated to supply water to any water storage feature that is connected to those water pipelines and is located within "restricted land" as depicted on that survey plan.
 - b. The holder may relocate the water pipelines depicted on the survey plan numbered "Water Pipes" from time to time to enable it to undertake its mining activities, provided that:
 - i. The holder shall meet the costs of the pipeline relocation; and
 - ii. The relocation must be done in such a manner as to cause no disruption to the land owner's ability to supply water to any water storage feature that is connected to those water pipelines and is located within "restricted land" as depicted on that survey plan.

Gents,

This is the MECS item that came in the other day from Geoge Houen related to Glencore's Wandoan project.

There are some valid points in the correspondence and while a caretaker letter is going back to Mr Houen I would like to work towards addressing these as soon as possible.

I think this is the last coal dealing we have outside of the hub and it is with you guys from a perspective of knowing the history and development.

From our understanding there were three elements potentially outstanding

- The IDP
- Some overlapping arrangements
- The conditioning of the ML.

The Hon. Andrew Cripps MP
Minister for Natural Resources and Mines
PO Box 15216
CITY EAST QLD 4002

6 January 2015

Dear Minister,

RE: WANDOAN COAL PROJECT

I refer to previous correspondence and the submissions I have made to you on behalf of my landholder clients who are either directly affected by, or are immediate neighbours of the Project. As you know, our submissions seek prompt grant or rejection of the mining lease applications for the Project, being numbers 50229, 50230 and 50231.

It is now almost eight years since my clients' properties were encumbered by these applications. Their businesses and lifestyles have been and will continue to be in limbo and burdened with uncertainty until the leases are either granted or rejected. The owners will receive no compensation until grant. Meanwhile the properties are rendered effectively unsaleable, potentially placing the owners' standing with their lending institutions under duress.

Your Policy Advisor Matthew Van Horen advised by letter dated 29th August 2015 that you were awaiting information from the mining lease applicants and, once received, that information would allow you to give consideration to the lease applications.

My searches through Right to Information reveal that Glencore, on behalf of the lease applicants, agreed with your department on the form of amendments to the Initial Development Plan (IDP) to allow for the expected delay in commencement of construction and mining. Revision of the IDP was the only outstanding issue.

On about 17th October last your department advised Glencore that it wished to have the revised IDP incorporating that agreed form of amendment by mid-November, to allow you to give consideration to grant of the leases by the end of the year. However, a register search today shows no decision on the lease applications yet recorded.

All statutory approval and compensation processes for the lease applications have been completed. Mutually agreed amendments to the IDP were settled and as of mid-October were only awaiting written confirmation.

As I have previously emphasised, lease applications are not holding tenures. I submit, with respect, that as Minister you have a responsibility to recognize the landholders' third party interest and to ensure that the decision process is completed as quickly as is reasonably possible. If through circumstances - including the state of the coal market - it is not appropriate to grant the leases then the applications should promptly be either rejected or converted to the appropriate holding tenure, which is the mineral development licence.

My clients would appreciate your advice as to what action is being taken to complete the decision process, and a date by which you expect your decision will be completed.

Yours faithfully

Subject: RE: Wandoan

Hi Stephen

All that remains outstanding is approval of the Coordination Arrangement (CA), and the approval of the Initial Development Plan (IDP).

The amended IDP is to be lodged by Glencore which accounts for the proposed new timeframe for commencement of mining and also to align with the CA. Once the amended IDP has been provided and is assessed as acceptable, ministerial approval for the CA will first be sought, with subsequent approval then to be sought for the IDP (after the CA approval has been given). I understand that Glencore are progressing the amendments to the IDP.

The proposed special conditions for MLA 50229 & MLA 50230 have been agreed to by the applicants and that matter is finalised. Draft grant briefs for the three MLA's have been completed by me and will be finalised after the above-mentioned approvals have been given.

Also FYI, Wandoan is **not** the only coal project at Dalby. The following coal projects are presently still being administered by the Dalby office:

[redacted]
s.73 Irrelevant information

- Glencore – MLA 50229, MLA 50230, MLA 50231 – Wandoan

Gents,

This is the MECS item that came in the other day from Geoge Houen related to Glencore's Wandoan project.

There are some valid points in the correspondence and while a caretaker letter is going back to Mr Houen I would like to work towards addressing these as soon as possible.

I think this is the last coal dealing we have outside of the hub and it is with you guys from a perspective of knowing the history and development.

From our understanding there were three elements potentially outstanding

- The IDP
- Some overlapping arrangements
- The conditioning of the ML.

s.73 Irrelevant information

Would it be possible to get a few dotpoints on the status of the three outstanding issues above and the plan of attack in moving this one forward.

Hi Stephen

The assessment and recommendation for the IDP (latest version) was done up previously by the Brisbane assessment staff and the IDP (with that assessment) was forwarded to Mark Kelly some months ago now. I believe Dave Ralph has it in hand at present.

So I'm not actually sure who will be finalising the IDP assessment. I can check with Mark this coming Friday and verify how the assessment of the Wandoan IDP and its subsequent approval, will be finalised once we receive the amended version.

Thanks Ken,

I take it the TAS team up here with Celeste will co-ordinate the assessment and approval of IDP so I will give them a heads up.

The coal hub guys would be extremely keen to have a look at the conditions that have been drafted if there are to be special conditions on the lease. Could you fire those up to Paul and the team for them to have a look at.

Thanks mate

Subject: Technical Assessment - Proposed Initial Development Plan - Wandoan Project Mining Lease Applications (MLAs) Numbers 50229, 50230 and 50231.

G'day Fergus.

As you may be aware, I was given the physical hard copy of the Technical Assessment (TAS) for, and the Initial Development Plan (IDP) lodged, for the Wandoan MLAs 50229, 50230 and 50231, from Ken Goodwin. I have just passed on to you as I write.

These MLs are subject to two coordination arrangements with petroleum tenure holders whose tenure overlap the area of these MLAs. These coordination arrangements are the subject of a Ministerial Briefing Note (CTS 11812/14) seeking the Minister's consideration of their approval.

As a result, if and when the Minister approves these coordination arrangements, the MLs may be progressed for consideration of their grant without further reference to the overlapping provisions under Chapter 8 of the *Mineral Resources Act 1989* (the MRA). These MLAs cannot be granted until the IDP is approved for these MLAs.

Also, pursuant to section 318DX of the MRA, the proposed IDP needs to be assessed for consistency with the (approved) coordination arrangement. As yet, this has not been assessed in the IDP TAS.

May I please ask you to amend the current TAS, so that if the Minister approves the coordination arrangements, the IDP approval is also ready to be considered by the Minister/delegate.

I will let you know as soon as I am made aware of any decision by the Minister, about these coordination arrangements.

Thank you.

Subject: FW: Shapefiles

Hi Michael

As discussed, please find attached the shape files for the Wandoan mining lease applications (MLA 50229, MLA 50230 & MLA 50231) for putting into MinesOnlineMaps.

The areas were previously all recharted on Merlin but the surface area was unable to be charted for MLA 50229 (it still shows up as "whole" on MOMaps). In addition, the rotation that was done on Merlin for all three MLA's to match up better with DCDB was only a best guesstimate and will be slightly out when compared to the survey.

Areas were corrected on Merlin after Merlin recharting to reflect the area of the lease as given on each registered survey plan (rounded to 4 significant figures).

MLA 50229 is the one with the areas of restricted land excluded from the surface area of the mining lease. The MP numbers for these MLA's are on MP39561, MP39562 & MP39567.

Can these shapefiles be uploaded (after checking with the MP's) onto Mines Online Maps?
